

Status on farm upgrade packages

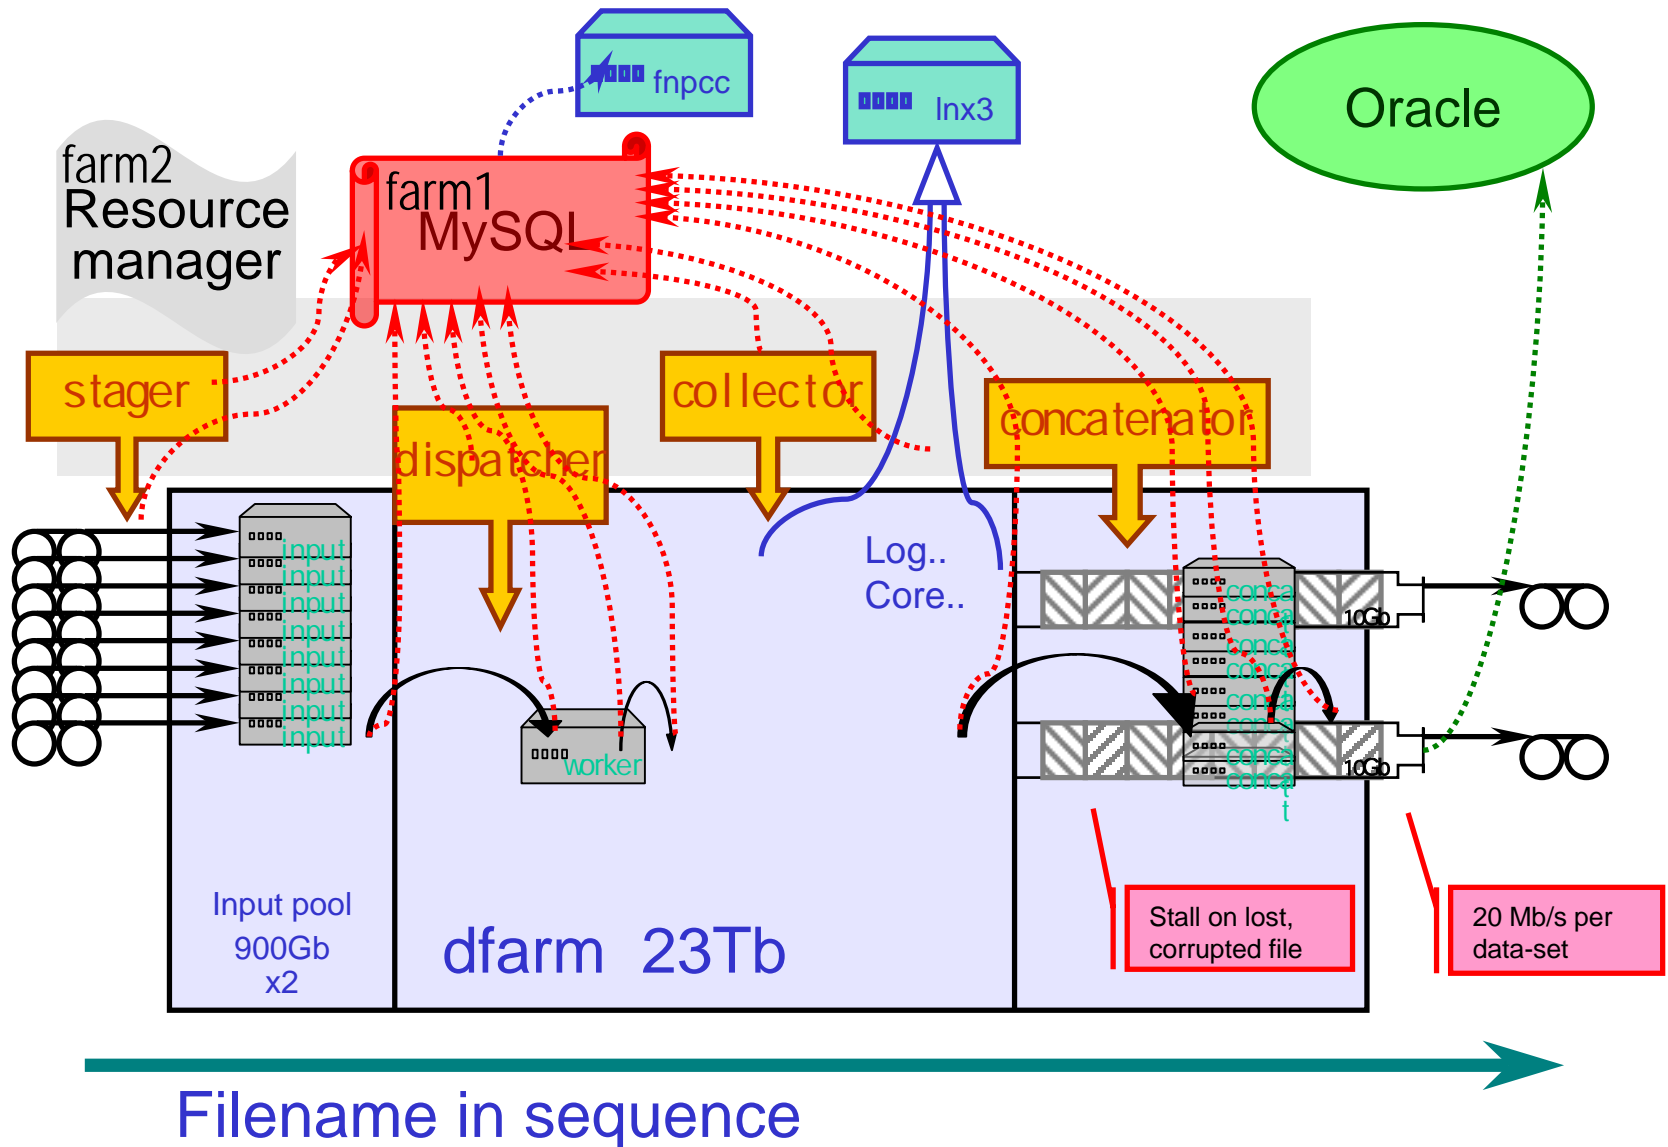

Suen 2004-09-03

- ProdExe ready to deport to CAF
- Concate ready for test
- Setting up “cdfprd” on CAF
- Prepare durable cache

Farm upgrade

FPS farm

SAM for ProdExe

- ❑ Define input dataset
- ❑ Define durable/prod dataset by a lookup table
- ❑ Beginning/Recovery of a job (one input file)
 - Not by “minus consumed”
 - Check existence of children
 - Check release status ? (not yet implemented)
 - Register crash event (not yet implemented)
- ❑ Endof a job
 - Release ok, 4-crash, failed
 - Register children by a lookup table

SAM for Concat

- ❑ Snapshot durable/prod dataset

- ❑ SAM file list

 - sort, SAM locate ← validate physical existence
cumulate into TCL's up to 1 GB

- ❑ Merge by AC++Dump TCL (no SAM)

- ❑ End of a job

 - SAM erase location ← one pass only
delete from durable storage
